

Good morning to you

Kerri-Ann Smith

We understand that the A-G is urgently seeking agreement from the States and Territories in order to amend classification laws to require the Classification Board to **refuse** classification of material which advocates (and praises) **terrorist acts**.

I know that we speak for many of our close friends in supporting this amendment. We were totally dismayed at the way the *Muslim Junior Martyr's Death DVDs* were given such a mild and generous classification. That must never happen again.

Thank you for considering our petition.

Sincerely

Alan and Rhonda Owen
