This plan is wholly unAustralian it goes against the ideas of fair right to privacy and freedom to communicate. This is nothing more than an entrapment scheme to start using Meta data for purposes other than what was sold to the Australian people! Furthermore your underhand tricks to hide this in an announcement at Christmas shows exactly the dubious nature of this plot to further erode freedoms and protections of the Australian people by this government and your department. You should be ashamed of yourselves! I will be alerting everyone and anyone I can about this cloak and dagger legislation that you are pursuing.

Shame on all of you,

Lloyd Cook
