</table>

Note: This table relates only to the provisions of this Act as originally enacted. It will not be amended to deal with any later amendments of this Act.
3 Objects

The object of this Act is to provide a framework for managing national security risks relating to critical infrastructure, including by:

(a) improving the transparency of the ownership and operational control of critical infrastructure in Australia in order to better understand those national security risks; and

(b) facilitating cooperation and collaboration between all levels of government, and regulators, owners and operators of critical infrastructure, in order to identify and manage those national security risks.

4 Simplified outline of this Act

This Act creates a framework for managing national security risks relating to critical infrastructure.

The framework consists of the following:

(a) the keeping of a register of information in relation to critical infrastructure assets (the register will not be made public);

(b) requiring certain entities relating to a critical infrastructure asset to provide information in relation to the asset, and to notify if certain events occur in relation to the asset;

(c) allowing the Minister to require certain entities relating to a critical infrastructure asset to do, or refrain from doing, an act or thing if the Minister is satisfied that there is a risk of an act or omission that would be prejudicial to security;
(d) allowing the Secretary to require a reporting entity for, or an operator of, a critical infrastructure asset to provide certain information or documents;

(e) allowing the Secretary to undertake an assessment of a critical infrastructure asset to determine if there is a national security risk relating to the asset.

Certain information obtained under, or relating to the operation of, this Act is protected information. There are restrictions on when a person may make a record of, use or disclose protected information.

Civil penalty provisions of this Act may be enforced using civil penalty orders or injunctions, and enforceable undertakings may be accepted in relation to compliance with civil penalty provisions. The Regulatory Powers Act is applied for these purposes. Certain other provisions of this Act may be enforced by imposing a criminal penalty.

The Minister may privately declare a particular asset to be a critical infrastructure asset so that this Act applies to it. A private declaration can only be made if there would be a risk to national security if it were publicly known that the asset is critical infrastructure that affects national security.

The Secretary must give the Minister reports, for presentation to the Parliament, on the operation of this Act.

Note 1: An agent may give the information on the entity’s behalf (see section 28).

Note 2: If the reporting entity is not a legal person, see Division 2 of Part 7.

Civil penalty: 25 penalty units.

(3) The information must be given:

(a) in the approved form; and

(i) the end of the grace period for the asset; and

(ii) the end of 30 days after the day the entity becomes a reporting entity for the asset.

23 Ongoing obligation to give information

(1) This section applies to a reporting entity for a critical infrastructure asset if a notifiable event occurs in relation to the asset:
