Dear Sirs

I urge you to please give thoughtful and serious consideration to the submission of The Canberra Declaration in regard to the above issue.

It pains me to reiterate what may be construed as mindless cliches but future generations of our kids, the vulnerable, needy, the sick and their carers and those of us who have relied on the support and benevolence of religious organizations at some time or other depend heavily upon the outcome. There are obvious economic repercussions to be considered also. Please think carefully and act in accordance with clear and reasonable conscience.
