

I'm not entirely sure how these submissions work and you haven't really explained them properly.. so I'm just adding my 2c.

1. It has already been proven, numerous times, that meta data is NOT 'insignificant' and can be easily used create an accurate view of someone's profile and actions.
2. History has proven, numerous times, that this type of access WILL be abused.

So if you can't guarantee corruption free, abuse free use of this, then it is unacceptable.

Regards
Derp
