

This amendment is unjustifiable! The potential for abuse is palpable. Existing metadata laws already go way too far considering the complete lack of protections for innocent people. Roll back meta-data laws, install protections for Australians, don't gift these massive powers to everyone and anyone. Stop privatising our privacy! Stop selling laws against the public interest! It's corrupt! Investigate the proponents of this amendment! Publish their metadata!

Sincerely,

Concerned Thought-criminal / citizen.
