

Hello George Brandis

I am concerned that you want to expand the metadata laws for other uses e.g Piracy

Maybe you should focus on making Netflix, iTunes & other streaming/purchasing services up to date with the latest episodes/movies. This way the piracy rate will drop quickly.

Also you should update the security laws to protect the community from overseas teenagers who are running rampant in Melbourne and the surrounding suburbs.

They are causing harm, paranoia and stress to many people. I don't feel safe in my community anymore. I used to but after recent events in the last few months(Parkville/Malmsbury detention centers) it is concerning that nothing is being done about it.

Perhaps you should be focusing on fix issues such as overseas immigration in Australia and fixing the bail laws instead of focusing on trivial matters such as piracy.

From concerned citizen
