

Dear Sir / Madame,

I do not agree with the new Meta data laws being proposed.

I thought we lived in a democratic society! This is not democracy.

These new laws are a slow erosion of our civil rights under the guise of protection.

People are waking up to this nonsense. Governments will be voted out for introducing this sort of thing.

Next you'll want to put web cams in peoples homes just in case someone breaks in, you'll be able to catch them.

Thanks but no thanks. We are a wake up to you.

Maybe I'll move to Russia, seems to be the only country in the world with a real leader.
