

Dear Attorney General,

I disagree with the governments consideration to extend the meta data laws to allow it to be accessed for civil cases or beyond its current restrictions in any way. This is a direct conflict with our privacy laws.

I can only see it creating more harm than good. Especially in civil cases, where behaviours of both lawyers and their clients can be abhorrent and destructive.

This action would remove all public trust in the government and feed narcissistic behaviour which is never a good thing. We are all entitled to our privacy.

Be a strong and just government for the people who voted you in. Do not dismiss us and throw us out with the bath water!!

Kind Regards  
Kelly Gosnell
