

This bill and review is a violation of my rights and freedoms as a human being in a democratic society.

I am strongly opposed to this attempt to see that telecommunications data be used and accessed in civil proceedings.

Your attempts to categorise this under a facade of safety is appalling and disappointing. Moreover, is an insult to my intelligence as a citizen of this society.

Please have it known that I am a citizen of this country, strongly opposed to the undemocratic, authoritarian and oppressive motion you are putting forth.

Sincerely,

Mitchell Robinson
